

6 pillars of reforestation

AIR

Trees take in harmful pollutants and release clean oxygen for us to breathe.

WATER

Trees filter water, prevent floods, and maintain Earth's water cycles.

BIODIVERSITY

Forests provide habitat to many animals, birds, insects, fungi, moss, and plants.

SOCIAL IMPACT

Trees provide jobs and food security to many communities.

HEALTH

Trees and nature reduce stress, aid in recovery, and promote overall wellness.

CLIMATE

Trees absorb carbon dioxide & other pollutants, helping to clean air and regulate climate.

GLOBAL REFORESTATION

One Tree Planted is a 501(c)(3) nonprofit organization based in Vermont.

We plant trees on 4 continents around the world: North America, South America, Africa, and Asia.

Reforestation focus areas include wildfire restoration, biodiversity and habitat expansion, agroforestry, food security and social impact, and watershed maintenance among others.

ONE DOLLAR. ONE TREE.

**ON A MISSION TO RESTORE
THE WORLD'S FORESTS**

ONETREEPLANTED

One Tree Planted works with a network of on-the-ground partners around the world to ensure that the most sensible mix of tree species are planted at the right time and in the best ways for optimal survival. Trees are planted by professionals, volunteers, or a combination of both depending on the project.
